

## Would you like to see an example of how I charge?

Many parts can have individual prices. Below is a sample list. Modern glues other than hot hide glue and difficult-to-remove materials will negate the figures, below. In that case, we might charge some things by the hour plus whatever materials were required to fix it, but just call me. My hourly rates are \$35.00 when we don't know what we will encounter or for extra work. Restored Parts are clean and finished presentably.

Why Rebuild an old pneumatic Player? Because they last 2 generations without any attention or problems when thoroughly restored and tested. They are the most reliable devices yet invented. Do it once, right, all the way through and guaranteed.

**Shipping these parts seldom requires wooden crates. I'll explain how to do it. I can usually ship completed Ampico and Duo-Art stacks and pumps back in their original cardboard boxes that you will ship in, UPS all the way to Hawaii and New Zealand. Don't make a "federal case" out of it. We've not had a problem yet. Do it the simple way.**

<b>All Work tested &amp; unconditionally guaranteed, materials and performance!</b>		
<b>ITEM</b>	<b>PRICE (no shipping)</b>	<b>EST. DELIVERY</b>
<b>small pneumatic set (88)</b>	usu. \$528.00 (\$6/ea), clean, hinge, and cover	1 month
<b>larger bellows</b>	.50 cents/sq. inch area, max	1 month
<b>88 note Player stack, incl. Valves, pouches, pneumatics, gaskets, all tests.</b>	varies, depending on brand, but usually between \$2300 and \$2800	3-4 months, but usually quicker
