

February 17, 2009

Hi John,

I enjoyed chatting with you yesterday. As I mentioned, I am sending you a partial "kit" for the Duo-Art Expression Box.

These parts are manufactured by me, and are faithful reproductions of the original pieces in material and size. It is my intent to offer these kits to the trade, but have not worked out options and prices yet. For example, do I sell the complete kit such as shown in the attached photo, or should the main body, accordion pneumatics, knife valve/pneumatics, etc. be offered separately?

Let me know what you think, your input would be appreciated.

I'm also looking forward to receiving the Wurlitzer Block Valve from you. Once I have reviewed it, I'll let you know what can be done to reproduce it.

Thanks for your help,

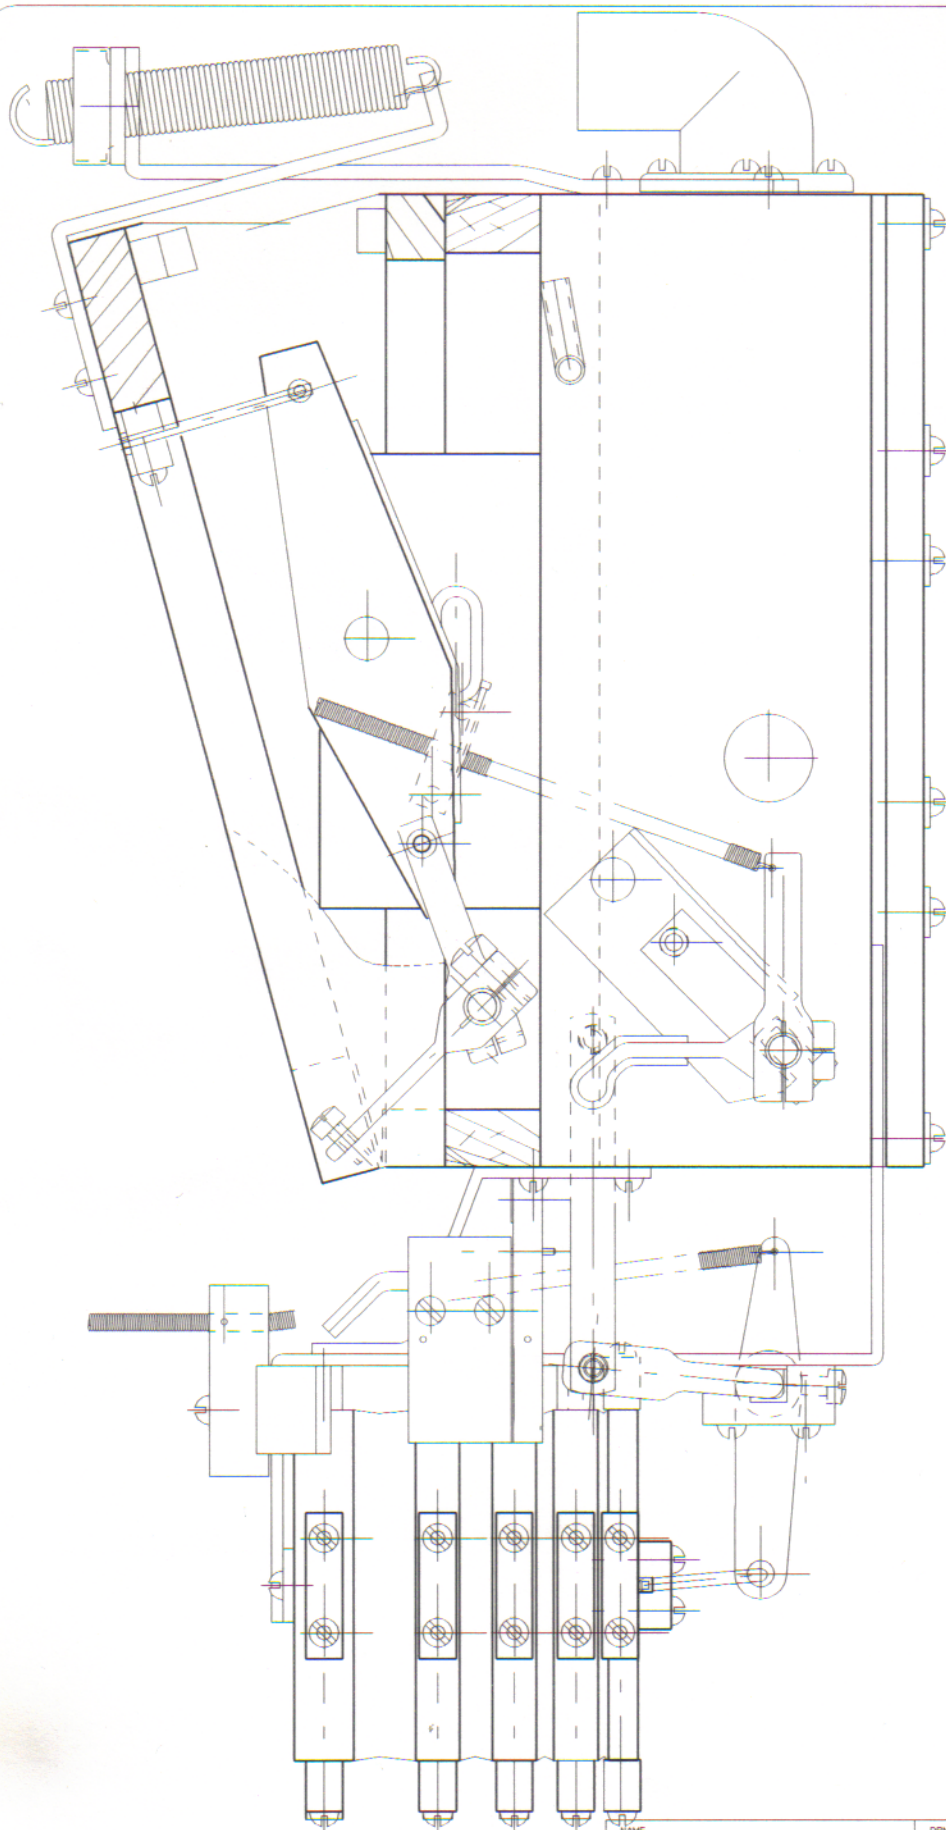

Alex Provan
