

The electric Shampoo Polisher

NEW HOOVER ELECTRIC SHAMPOO POLISHER

The new Hoover electric shampoo polisher gives your carpets that fresh-as-new look—saves you all the hard work. It has been designed to do a really professional job of shampooing your carpets, yet it is so simple to operate, so light to handle, a child could use it. There's no stooping or pushing. Press the foot switch, pull back the handle and let the machine do the rest.

This is how it works

The plastic tank, which lifts off for easy filling, holds enough shampoo to clean a 9' x 12' carpet thoroughly. The solution is released by a trigger on the handle. After starting the machine you simply guide it over your carpet, covering an area of about one square yard at a time. The machine has low contours, so it will glide easily under modern furniture. It is handsome to look at too—finished in two tones of blue. For absolute safety, the appliance is double insulated, and is fully suppressed against Radio and TV interference.

IT POLISHES WOODWORK, TILES AND LINO -SCRUBS FLOORS TOO

A simple change of attachments, and the machine is ready to save you two other kinds of hard work. To polish floors you fit the all-purpose brushes provided. After applying the wax, the machine is set to work, first spreading the wax, then polishing. Liquid wax can be applied from the dispenser. Use the special pads provided for spreading—they clip over the brushes. For a really high gloss, the job is finished off with felt polishing pads.

To scrub floors the tank is filled with detergent or a special floor cleaning agent. After that, the Hoover polisher does all the work.

Specially designed shampoo brushes gently ensure that all the dirt is thoroughly removed.

The conveniently placed trigger on the handle gives you complete control over the flow of solution.

The lambs wool buffing pads will quickly give a gleaming lustre to tables and other furniture.

Simply fill the tank with detergent and you have the perfect scrubbing machine—no effort required.

No extras to buy with Hoover

All you need comes with the appliance. So does a free bottle of the specially recommended "Lever's carpet shampoo". This contains plenty of solution for the average size carpet. For perfect results it is essential that you always ask for "Lever's carpet shampoo" by name — further supplies can be obtained from your Hoover Dealer.

Storage is no problem

A special ring is provided at the top of the handle, so you can hang this appliance in your cupboard, saving valuable floor space.

Let's get the best— it's got to be Hoover
