

# IMPLEMENTATION SERVICES

# ACSLS

# MANAGER™

## SOFTWARE

### Key benefits

#### Minimize interoperability problems

Validate that hardware and software products work together before implementing a solution.

#### Reduce downtime

Avoid painful disruptions and minimize the chaos associated with scheduled or unscheduled downtime.

#### Avoid hiring under pressure

Minimize costly and time-consuming efforts to find skilled resources under aggressive time frames.

#### Reduce risk

Select the right service to achieve the results you want. Proven implementation methodologies used by StorageTek professionals will expedite results and satisfaction.

#### Maximize ROI

Achieve the benefit of new technology sooner by expediting the implementation and availability of new technologies.

StorageTek's Implementation Services helps you maximize the full benefits of your storage solution investments — right from the start. The Baseline Implementation Services offering for ACSLS Manager™ software includes the installation and configuration of the ACSLS Manager software, utilities testing, configuration of the StorageTek library in your operating environment and integration into your existing backup operation. In addition, the service includes design validation, documentation, project management and knowledge transfer.

#### Consulting services include:

- Project planning, outlining tasks and resources
- Status meetings and reports
- Documentation of issues encountered during project's lifecycle and escalation process
- Single point of contact between you and the implementation team
- Verification of customer requirements from pre-sales activities
- Validation of business requirements
- Verification of solution design and alignment of design-to-business requirements
- Validation of system interoperability
- Test plan development and execution
- Definition of testing acceptance criteria
- Documentation of project plan, design document, interoperability guide, engineering diagram
- Knowledge transfer of basic product operations, trouble shooting and event call management; support call procedures; product profile/configuration export procedures

#### Implementation services include:

- One ACSLS server
- One StorageTek ACS
- Installation of ACSLS server platform
- Installation and configuration of ACSLS Manager software
- Integration into client's backup application
- Setup of client communications with ACSLS server
- Setup of client access controls

#### Additional consulting services

In addition to Baseline Implementation Services, StorageTek® offers a higher-level consulting service for organizations whose implementation needs go beyond the baseline level.

#### Engage the storage experts

StorageTek's Global Services professionals help you address storage challenges by delivering integrated solutions that optimize and manage storage performance over the life of your data. Focused on cost management, reliability and flexibility, our proven methodologies and commitment to best-in-class, global professional services and multi-vendor support help you gain and sustain measurable results. Covering over 50 countries, more than 2,100 service professionals deliver solutions that support more than 17,000 customer data centers worldwide.
