

## TAPE MANAGEMENT

# STORAGETEK® L-SERIES™ LIBRARY ADMIN SOFTWARE

STORAGETEK'S  
OFFERINGS

### KEY BUSINESS BENEFITS

#### > Gain remote administration

Monitor a StorageTek L-Series tape library from any Web-based browser on your network — for anytime, anywhere accessibility and convenience.

#### > Simplify navigation

A familiar graphical user interface provides all the functional capabilities available from the library operator panel, using the software's easy, two-level navigation.

#### > Enhance your view

Critical diagnostic and statistical capabilities are available at a glance, so you can see the big picture, clearly, completely and immediately.

#### > Increase availability, security

Remote monitoring keeps pace with real-time business needs, enhancing the availability and security of your tape libraries — 24 x 7.

#### > Gain seamless operation

Library Admin software integrates seamlessly with StorageTek Framework Library Monitor software for added information and functionality.

#### > Work with a leader

With over 30 years of storage leadership, StorageTek is well positioned to meet your growing storage management requirements.

StorageTek® L-Series™ Library Admin software makes it easy to monitor and administer StorageTek L-Series tape libraries from any Web browser on your network. This browser-based graphical user interface (GUI) gives you all the functional capabilities available from the library operator panel, all via simple, two-level navigation. In short, Library Admin software helps you gain greater control of your libraries — and calm the chaos of rapid data growth.

### MONITOR WITH EASE

#### See everything from anywhere

When you see the big picture, you gain control of your tape libraries. Library Admin software lets you do just that. You can obtain detailed information about libraries, drives and CAPs, including error conditions, configuration and drive/media-use statistics at a glance. Library Admin software provides a user-friendly, snap-shot view of the entire library system and settings. The displayed cell map provides the real-time location of every cartridge, and a simple click provides even greater detail for that specific tape.

Similarly, drive status is indicated right down to the serial number and firmware version.

With Library Admin software, you can easily manage multiple-site, administrative tasks from a remote site, including system reboot and code loads. It logs error codes and the complete tape cartridge inventory. Add its key diagnostics capabilities and statistics and you get the picture — completely, consistently, immediately.

Along with remote monitoring for secure accessibility anytime, anywhere, the Library Admin software provides enhanced library administration for lights-out operation.

#### A framework for doing more

The Library Admin software integrates seamlessly with the StorageTek Framework Library Monitor software, which runs within a system management framework (SMF). If you have an SMF and Framework Library Monitor, you can launch L-Series Admin software right from the framework, taking advantage of added information and functionality without leaving your seat. For seamless monitoring of your storage environment, Library Admin software allows you to perform functions from a remote location.

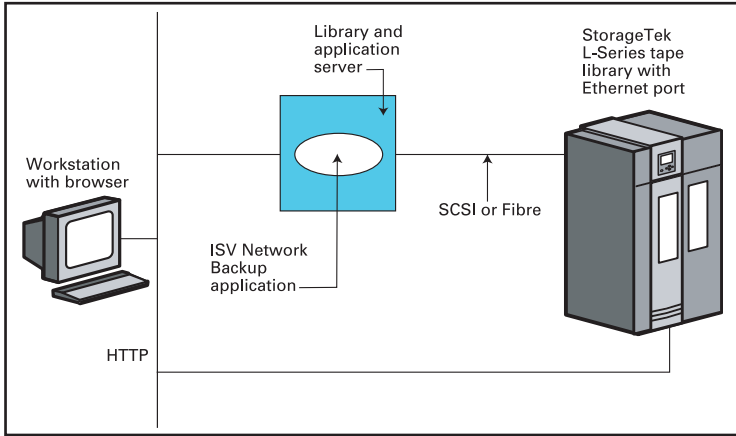

### APPLICATIONS

#### Tape library administration

StorageTek L-Series Library Admin software is often used with StorageTek Library Manager software and Framework Library Monitor software for complete library management. Library Admin software enables monitoring of StorageTek L-Series tape libraries from any Web browser on your network.

Library Admin software fully utilizes the Ethernet port and embedded Web server functionality of StorageTek L-Series tape libraries.

## STORAGETEK® L-SERIES™ LIBRARY ADMIN SOFTWARE

### SUPPORTED TAPE LIBRARIES:

StorageTek L20, L40, L80 with firmware level 2.0 or higher

### SUPPORTED TAPE DRIVES

All tape drives supported by L-Series tape libraries

### SUPPORTED INTERNET BROWSERS

Netscape Navigator 4.7 or higher with Sun Java Plug-in 1.2

Internet Explorer 5.0 or higher with Sun Java Plug-in 1.2 (<http://java.sun.com/products/plugin>)

### ISV CERTIFICATION

None required
