

LIBRARY MANAGER

SOFTWARE

Key benefits

Centralize management

Library Manager software provides centralized management of all your SCSI-attached tape libraries.

Reduce equipment purchases

With the ability to share resources among applications — all from a single source — you can reduce your overall investment in equipment.

Gain control

With Library Manager software, it's easy to monitor, control and manage libraries from a single point. There's no wasted time switching between — and training on — different software programs.

Simplify administration

A Java graphical user interface simplifies tape library administration. It provides easy, intuitive access to all of your library functions.

Use popular backup applications

Library Manager software supports any application using the widely accepted ACS API — including applications from VERITAS, LEGATO, Computer Associates, Tivoli and Hewlett-Packard.

Share libraries

Control library functions from any remote workstation to make library sharing faster and easier.

Upgrade as you grow

Because the library control path is separate from the application data path, your solution is ready to grow. Just add larger tape libraries as needed.

Library Manager software

Library Manager software helps centralize the management of your tape environment. It provides central library sharing among popular backup applications, along with common robotics control for StorageTek® SCSI-attached tape libraries. These capabilities can help you unleash trapped value by simplifying administration, increasing asset utilization and lowering your total cost of ownership.

Unleash trapped profits

Standardized interface

Library Manager software supports the widely accepted automated cartridge system (ACS) application programming interface (API). This ACS API is supported by a host of popular backup applications, including products from VERITAS, LEGATO, Computer Associates, Tivoli and Hewlett-Packard. Backup applications can be distributed across your network with complete compatibility.

Easy, centralized management

Library Manager software provides a single, centralized source for monitoring, sharing and controlling your tape libraries. With its familiar-looking Java graphical user interface (GUI), tape library administration just got easier. Whether you're controlling/monitoring one library or many, the interface provides easy access to all library management functions.

What's more, access via the GUI lets you control library functions from any remote workstation, making library administration faster and more convenient than ever. Your staff stays on top of the information your organization needs 24 x 7.

Consistent control, complete scalability

By separating the library control path from the application data path, Library Manager software provides consistent control regardless of how fast you grow. As your storage demands increase, simply add the larger tape libraries you need without changing your existing network applications.

Reduced equipment investments

Library Manager software's unique approach to library sharing and centralized management can reduce capital equipment investments and cut the administrative time and costs that come with stand-alone storage systems. In short, you can improve efficiency and minimize costs through consolidation. And that can make everything run more smoothly throughout your organization.

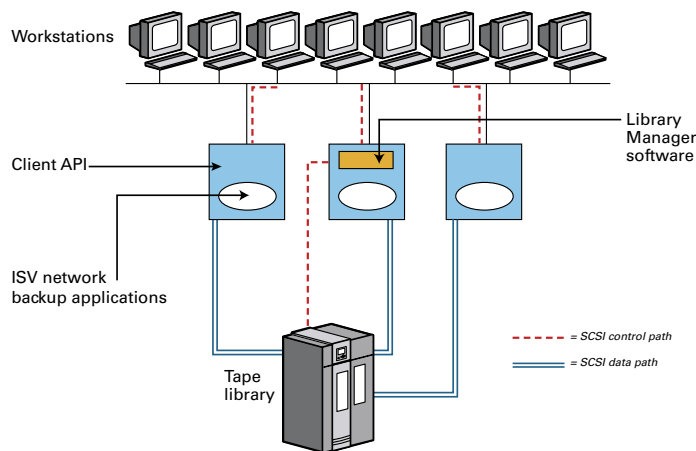

Applications

Tape library management

Library Manager software is often used with L-Series™ Library Admin software and Framework Library Monitor software for complete library management of SCSI-attached tape libraries. Library Manager software provides central management, sharing and common robotics control.

To learn more

To learn more about the Library Manager software and how it can help you unleash trapped profits in your storage environment, talk to your StorageTek representative.

With its centralized management and unique capabilities, Library Manager software helps keep you in control of your tape libraries.

Library Manager software specifications

Operating environment

Minimum software requirements	Windows NT/2000-based backup applications require Library Attach software to interface with Library Manager software
	Library Attach software can be ordered with Library Manager software.
Minimum hardware requirements	Pentium III 166 MHz CPU, Ethernet adapter, 128 MB RAM, 2 GB of available disk space, color SVGA monitor, 1024 x 768, SCSI adapter
	(Library Manager has been tested using Adaptec differential SCSI adapter cards)

Compatibility

Supported operating systems	Windows NT 4.0 with Service Pack 4+
	Windows 2000
Supported storage systems	Tape libraries
	L700e
	L180
	TimberWolf 9740, 9710, 9714, 9730 and 9738
	L20
	L40
	L80
	Tape drives
	SDLT, DLT
	LTO
	T9840 and T9940
Supported internet browsers	Netscape Navigator 4.5+ with Java Runtime Environment (JRE) 1.2.2
	Internet Explorer 5.0+ with the latest Service Pack and Sun Java Runtime Environment 1.2.2
Supported backup software	Computer Associates ARCserveIT 6.6.1+
	Hewlett-Packard Omniback 3.1.5
	Legato NetWorker 5.5.1+
	VERITAS NetBackup 3.2

ABOUT STORAGETEK®

Storage Technology Corporation (NYSE: STK), a \$2 billion worldwide company with headquarters in Louisville, CO, has been delivering a broad range of storage management solutions designed for IT professionals for over 30 years. StorageTek offers solutions that are easy to manage, integrate well with existing infrastructures and allow universal access to data across servers, media types and storage networks. StorageTek's practical and safe storage solutions for tape automation, disk storage systems and storage integration, coupled with a global services network, provide IT professionals with confidence and know-how to manage their entire storage management ecosystem today and in the future.

StorageTek products are available through a worldwide network. For more information, visit www.storageitek.com, or call 1.800.275.4785 or 01.303.673.2800.
