KitchenAid

It's everything you wished for in a dishwasher

Exclusive variable fascias.

Your KitchenAid Dishwasher matches the rest of your kitchen design thanks to optional fascias — even the upper panel can blend perfectly. New design integrates machine even more unobtrusively.

Uniformly fits any kitchen.

The new KitchenAid is designed for modern kitchen requirements — fits into 60 cm x 60 cm module. A boon to architects, designers and customers. Free-standing models are also available.

Optional plinth heights.

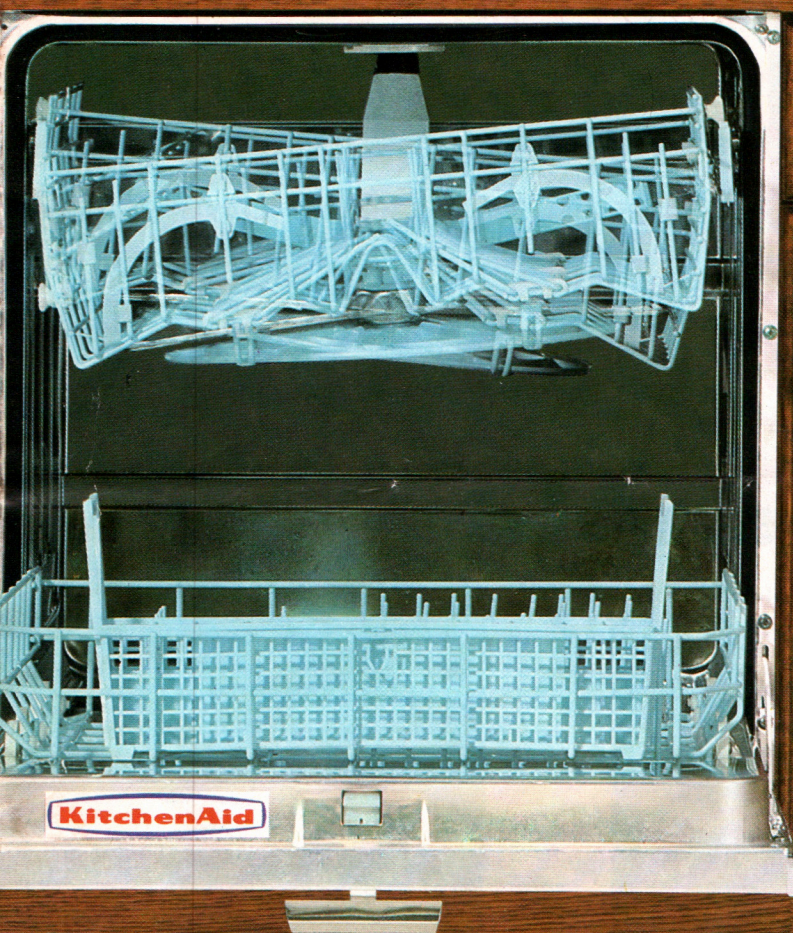

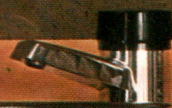

Available up to 22 cm to make a perfect match with the lines of your kitchen furniture. Standard height 10 cm.

Wash'n'Dry convenience.

Warm air drying is only one of the many exciting convenience features to be found in the new KitchenAid. Sanitised, heated air is gently circulated over, under and around each item, avoiding hot spots which could harm good plastic ware.

Full 12-Place capacity with 16-position upper rack.

KitchenAid Superba makes full loading easy with a Space-maker upper rack that you can adjust even when its full — another exclusive! Nine-position dividers in the upper rack hold glasses firmly and safely. Lower rack will take plates up to 30 cm in size.

Hot'n'Cold connection.

Most dishwashers can only be connected to one supply — hot **or** cold. Cold water lengthens cycle time, uses more energy . . . too hot water 'cooks-on' food and can damage delicate glass ware and plastic items. KitchenAid enables you to avoid these extremes by using a dual fill valve for hot **and** cold water connection.

Load as you like.

Exclusive Hydro-Sweep wash system incorporating constant upper rinse and middle wash arm provides the ultimate in multi-wash action and complete flexibility in loading.

Optional water softening system.

Available when required for hard water areas. Can be adjusted to suit varying degrees of hardness. Built-in sensing device constantly measures water softening salt concentration — warning light glows when it is refill time.

Check these exciting features.

- Power ball bearing motor ensures long life and quiet running
- Rinse Aid indicator light on Superba indicates when dispenser needs refilling
- Self cleaning stainless steel filter.
- Soft food disposal system has stainless serrated cutting edges to reduce soft waste into tiny particles which

will wash away easily.

- Trim kit for decorator panels fitted as standard.
- Seam free stainless steel wash chamber.
- Action indicator shows cycle position.
- Exclusive 'Flo-Thru' drying.
- Takes tableware and cooking utensils in **one** mixed load.
- Hot and Cold water connection.

The Superba offers six cycle options for performance and economy.

Full Cycle

The complete wash program for care and power. Leaves contents — even glasses — sparkle-clean, warm and dry.

Soak Cycle

Designed for heavily soiled dishes and pots, pans, casseroles, etc. Special long soak eases away cooked-on material.

Sani-Cycle

Extra hot 80 degree C rinse sanitises contents.

Saver Cycle

Reduces water and power consumption . . . cuts costs.

Rinse and Hold Cycle

Ideal for part-loads. Pre-wash action removes waste food, ready for full wash later.

Cancel-Drain Cycle

Quickly drains the machine and enables you to cancel and re-select a cycle at any time.

Unobtrusive Operation.

The KitchenAid Superba has a special layer of thick, sound-absorbant material — it “tip toes” into action.

Hobart Quality.

All these features place the Superba in a class of its own. That's because it's built by Hobart, world leaders in commercial and dishwasher design. A superb blend of American technology and European engineering. If only the best is good enough it must be KitchenAid.

(Also available is the KitchenAid Europa, a budget priced model incorporating many of the top of the line Superba features. See back page for specification.)

Where experience counts.

KitchenAid products are built by Hobart, and Hobart have been in the dishwashing business for 85 years. That gives us a head start on our competitors. We have used that start to concentrate on experiment and development to keep ahead of the field.

We are, for instance, the only manufacturer with so many exclusives – the Flo-Thru drying system is only one innovation that keeps KitchenAid in the forefront. KitchenAid specialises in products designed to make life in the kitchen easier.
