

VICTA

***turns grass into lawn
like never before***

the fabulous **VICTA**

engine

TUNED TO

ZOOM

The Series 70 engine is designed for and tuned to BP Zoom. It will operate satisfactorily, however, on a 2-Stroke mix of one half of a pint of BP 2-Stroke oil to one gallon of BP Regular petrol.

The Series 70 is the most advanced 2-Stroke power unit in Australia. Genuine, Victa-made Series 70 engines are identified by a silver V on the engine cowl. The Series 70 is the latest development of the *only* Australian-built engine originally designed for motor mowers. Key features are covered by Victa patents.

LONG LIFE—

Triple bearing crankshaft combined with the 15 rollers in the big end and the hardened steel crankshaft journal, give longer life to the Series 70 engine.

GREATER POWER—

160 c.c. version develops maximum torque in a range through from a low of 1800 r.p.m. to a high of 4200 r.p.m. Gives extra powerful cutting . . . is almost impossible to stall.

125 c.c. version gives a similar power curve in ratio to its capacity . . . with remarkably high anti-stall properties.

DESIGN SIMPLICITY—

Developed through years of practical experience the Series 70 Victa engine is a masterpiece of simplicity. Victa has made more lawn-mower engines than all others combined.

INSTANT STARTING—

Swift and sure every time. Fully sealed coil prevents current leakage. Victa-designed ignition system perfected through years of long research, combines with the new G3 carburettor to ensure precision firing . . . maintain even running.

CONDITIONED TO ALL CLIMATES—

The carburettor design, the magneto points, the air filtration, give Victa the flexibility to operate perfectly under all weather conditions. Victa is exported to 40 overseas countries. It has proven its ability to perform superbly in any climate.

EASY MAINTENANCE—

The design simplicity of Victa mowers ensures that maintenance is easy and inexpensive. Every single component of the Series 70 engine (like every Victa series before it) can be replaced, rebored or repaired.

Key-Lectric

MAGIC-EYE CATCHER INDICATOR

A sensational "first" from Victa! The unique indicator automatically activates to tell you the *instant* the catcher needs emptying.

Corvette
Cortina
Self-
Propelled

HIGH-THROW BASE PLATE

New base-plate design creates a cross-flow pressure-pattern spinning the grass higher into the catcher. Makes for maximum filling efficiency — even under wet conditions.

FITTED TO

DETACHABLE REAR CHUTE

Another great "first" from Victa. Special ejection-action to clean-sweep grass to the left — as you mow. Perfect when cutting into holiday growth, or going into rough patches — wherever you prefer *not* to use the grass catcher. When not in action, the ejector chute can be simply detached and hung away.

Corvette
Cortina
Self-
Propelled

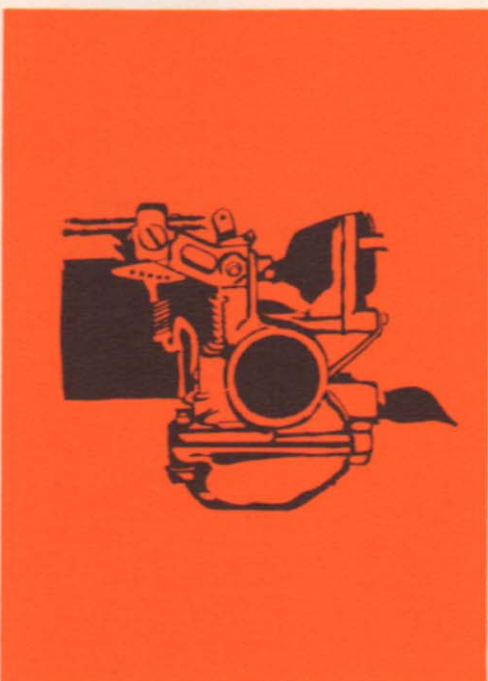

SINGLE-FINGER THROTTLE

Now you can control revs as finely as an aeroplane pilot — and just as easily. Inbuilt cut-out switch stops motor immediately.

SAFETY GOVERNED CARBURETTOR

Keeps engine revs steady — once you set them. Regulates power output to suit the lawn. Uses less fuel. Maintains more even running with controlled mixture.

SNORKEL AIR FILTER

Fitted high above the dust line. Filters abrasive dust particles from the air intake to minimise engine wear.

All models

HUSH-TONE MUFFLER

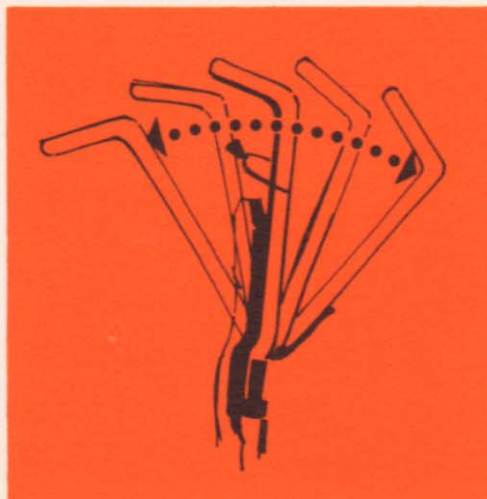

Helps to reduce engine noise and dissipates exhaust smoke — away from the operator.

**FITTED TO
All 2-Stroke
models**

MULTI-POSITION HANDLE

Tall or short, it meets your height—clicks right down to mow under bushes. Adjusts to several heights with Victa locking system.

Corvette

FULLY RECLINING (FOLDING) HANDLE

So you can park the mower out of the way — or carry it in the boot of your car — or mow under bushes.

All models

SAFETY RIM DISC BLADE ASSEMBLY

Victa's Safety Rim Disc absorbs shocks before they reach the engine bearings. Blades retract if they hit a solid obstacle.

All models

14 GAUGE STEEL BLADES

Never need sharpening. Aerodynamic design combines grass-cutting-and-discharge action into only two replaceable blades.

VICTA SAFETY

Victa guarantees that every mower at the date of manufacture completely fulfils Draft Australian Standard Safety Specifications for domestic power mowers. Many safety features are exclusive to Victa.

VICTA REPLACEMENT PARTS

It is almost true that old Victas never die. Every single part of any Victa of any age can be replaced, repaired or rebored. No other mower manufacturer can supply parts over such a wide span of time—and models—as Victa. But insist on genuine Victa parts. Victa cannot accept responsibility if imitation parts are used—that's about the only way to kill a Victa . . . and it's murder.

VICTA AFTER-SALES SERVICE

Victa's interest in your mower will last as long as your mower. Wherever you live or move to in Australia—or in any of the 40 countries to which Victa is exported—Victa Service is as close as your telephone.

VICTA GUARANTEE

Every Victa is covered by the famous Victa 12 months warranty. If you aren't *completely satisfied* that your Victa is operating correctly Victa **WANTS** to know . . . **WANTS** to see you satisfied.
