CORVETTE

Victa's biggest-selling model . . . Australia's biggest-selling mower. With its Series 70, 160 c.c. engine it's like driving a V8 car—sparkling performance with power to spare.

The multi-position handle is an exclusive. From fuel gauge to magic-eye catcher indicator — from detachable rear chute to the new single-finger throttle — the Corvette is every inch a leader. (Also available with a Kirby 4-Stroke engine for those who prefer a 4-Stroke.)

CORTINA

The Cortina is Victa's second most popular model. The main difference between the Cortina and Victa's line leader—the Corvette—is in engine power. The Cortina carries the 125 c.c. version of the famous Series 70 motor — while the Corvette mounts the 160 c.c. version.

The Cortina starts easily, manoeuvres beautifully and has many exclusive Victa features that set it way above other brands at anywhere near its price.

UTILITY

Here's the workhorse of the Victa range — a tough, lightweight, aggressive unit built without grass catcher or other frills . . . but designed to do a superb grass cutting job — on fine lawns or in thick jungle growth. 125 c.c. Series 70 power unit — very manoeuvrable and, surprisingly, many more exclusive Victa features than you might expect at the price.

LIST PRICE \$108.00

SPECIAL

Designed for a side catcher, but operates effectively without the catcher to "sweep as it mows". With the side chute (wind-rower) in place of the catcher, it sweeps neatly to the right. The Special is light, easy to manoeuvre and particularly effective in long grass. The 160 c.c., Series 70 power unit ensures that the mower is rarely extended.

LIST PRICE	\$138.50
CATCHER	\$ 14.30

SELF-PROPELLED

The mower has the power to propel itself — taking all the push out of mowing! You only need to steer. It is power-packed (160 c.c., Series 70 engine) to make light work of cutting heavily-sloped or very large lawns. Exclusive "stop-go" control bar gives safe, positive control — tilt forward to go — release to stop. It's that easy!

LIST PRICE	\$179.50
CATCHER	\$ 14.30

KEY-LECTRIC

Just turn the key and mow. It's as easy as starting your car. Nickel cadmium batteries in a compact unit mounted on the handle cross-bar provide the power. Batteries last for ages and are simply and economically trickle-charged overnight. If you forget to charge the batteries or lose the key, a rewind manual starter is built in as an alternative.

LIST PRICE	\$204.00
CATCHER	\$ 14.30

IMPERIAL

Here's the self-propelled reel-mower of the Victa range. Ideal for close-cropped, very fine lawns. Silent nylon gears eliminate ratchet noise and give full differential action. Victa reel-mowers are exceptionally quiet-running. The Imperial has large front rollers — segmented with axial clearance for easier steering and less drag. Other features include — Large-Capacity Grasscatcher, Five-Blade Cutting Reel, Free Wheeling, Even Weight Distribution for perfect balance.
