

# HOW TO USE YOUR NEW

# Princess® TELEPHONE

DIAL LIGHT CAN SERVE AS HANDY NIGHT LIGHT.

SWITCH ON BACK OF SET CONTROLS DIAL LIGHT.

## USING YOUR "PRINCESS" PHONE

To make a call on your new PRINCESS telephone just lift the handset, wait for the dial tone, then dial the number you would like to reach.

The dial light on your telephone is controlled by a small switch on the back of the set. With the switch in one position the dial is set to light up only when you lift the handset. The opposite switch position provides two light levels—the dial glows softly when the

handset is in its cradle, and brightly when the handset is lifted.

Replacement dial light bulbs are available from your Telephone Company Repair Service. You may adjust the volume of the bell by using the "loud-soft" switch beneath the set.

To clean your new telephone, simply use a damp cloth and mild soap. Detergents, chemically treated cloths, or harsh cleaning agents are harmful.

## HELPFUL TELEPHONE TIPS

- Always wait for the dial tone before beginning to dial.
- Be certain of the number you are calling. If in doubt, consult your directory.
- When dialing, be sure to turn the dial until your finger touches the stop; then release.
- If your area has Direct Distance Dialing, use the prefix code and Area Code (when required) for the location you are calling, if it is outside your own area. Area Codes are listed

in your telephone directory.

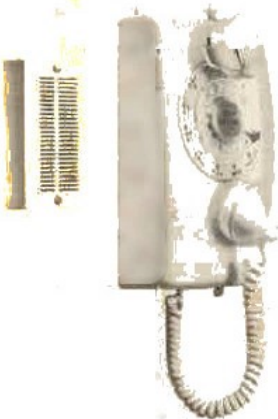

- To help others call you, tell them your Area Code.
- Don't mistake the numeral "one" for the letter "I," or the numeral "zero" for the letter "O," when dialing.
- To be heard clearly, use a normal tone of voice and speak directly into the mouthpiece of your telephone handset.
- If your telephone ever needs servicing, call your Telephone Company Repair Service.

## OTHER BELL SYSTEM PRODUCTS TO MAKE YOUR HOME MORE ENJOYABLE

BELL CHIME ringer calls you to the phone musically, with a melodic chime. Comes in velvety gold or soft ivory to complement any decor. It can also be set for the familiar telephone ring, or to ring loudly when you're outdoors.

Panel Phones represent the forward look in built-ins! The space-saving feature of this wall-mounted telephone makes it ideal for kitchens. Available in two models with a brushed aluminum or copper finish.

HOME INTERPHONE system. This fully transistorized system makes it easy to talk between telephones in a home. Door answering feature permits conversations with persons ringing doorbell. If desired, a calling party may be put on "hold" while using interphone to answer door or talk to another in the house.

Volume Control Handsets contain an amplifier and a convenient volume control in the handset. Designed for use in place of the regular handset, they provide varied amplification for those with impaired hearing or weak speech.

The PRINCESS® telephone is another product of BELL SYSTEM teamwork:

Developed by BELL TELEPHONE LABORATORIES

Manufactured by WESTERN ELECTRIC

Brought to you, as a service, by your BELL TELEPHONE COMPANY
