washes clean... and how

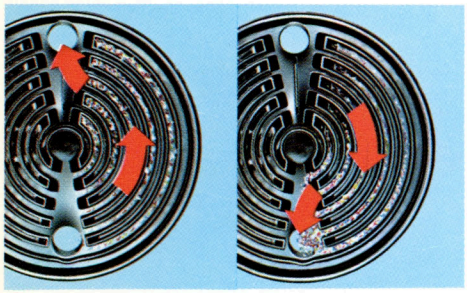

Super SURGILATOR agitator

More "scrubbing" currents, more "scrubbing" efficiency

Our new Super SURGILATOR agitator has an improved design to get clothes cleaner than ever before. We've extended the undulated vanes, so every movement of the agitator creates "millions" of the water currents that scrub clothes clean. And we've heightened the small vanes to increase scrubbing surfaces, make it possible to wash large loads really clean. Its bright, new finish makes the new Super SURGILATOR agitator even look clean!

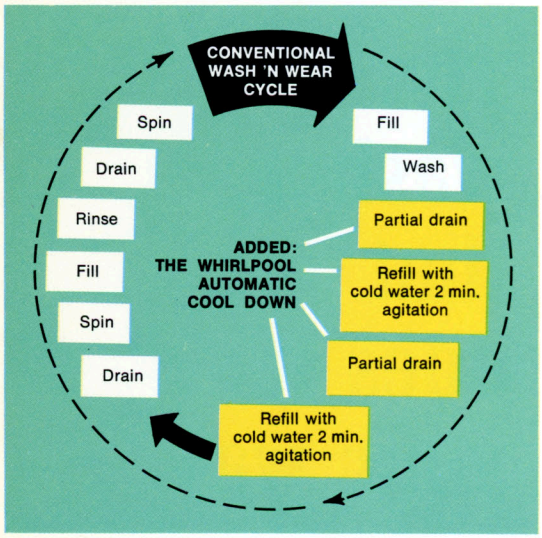

MAGIC CLEAN® self-cleaning lint filter

If anything about an automatic ought to be automatic, it's the lint filter. As our MAGIC CLEAN filter recognizes. Not only does it do a thorough job of trapping lint automatically, it also cleans itself automatically. So you're never trapped by the messy job of cleaning the lint filter.

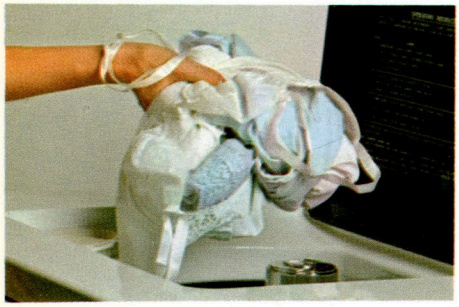

Improved Permanent Press care

The way you wash Permanent Press fabrics is every bit as important as the way you dry them. When clothes are spun while still warm and pliable from being washed in hot water, they can come up with wrinkles. That can't happen in a Whirlpool. As soon as washing is completed, the tub drains partially, then refills with cold rinse water before any spinning takes place (see cool-down diagram at right). Garments are cooled gradually, floating free, so they return to their original contours. Then they spin. And the spin has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

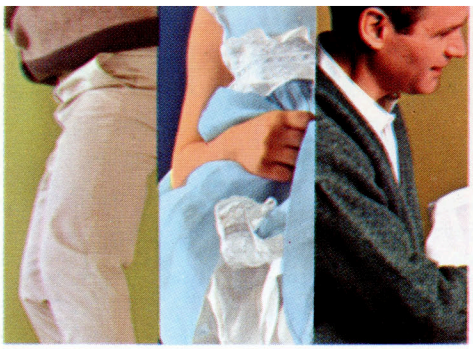

Special Hand Washable setting

Choose the Hand Washable setting when you have just a slip or two or a few pairs of nylons or any other washbasin-size load to do. That one setting automatically provides the LOW wash speed for hand wash care, gives you the correct water level for both washing and rinsing, too. No special attachments, no gadgets, no gimmicks.

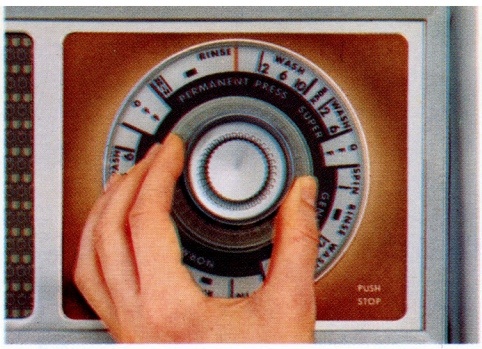

New decorator-designed front

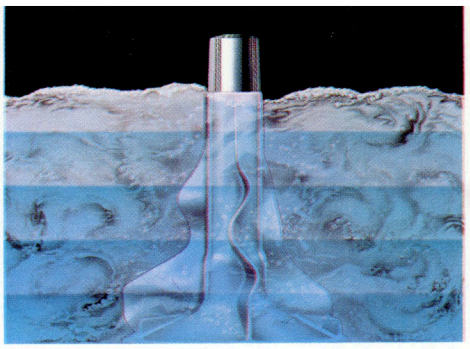

When you see the beautiful simulated walnut wood grain front of the Mark XII you may be tempted to put this new Whirlpool in the living room. We don't recommend it. But it will look great in the kitchen, bathroom, utility room or laundry room. And, if you like, you can match cupboards, walls or what-have-you simply by putting in your own panel. It's easy to do.

3 agitation speeds and 2 spin speeds give every washable fabric proper care

5 cycle selections for complete washing versatility

Choice of many water levels for both washing and rinsing

The modern washer that even gives Permanent Press fabrics better-than-ever care

5 cycle selections: NORMAL; GENTLE; PERMANENT PRESS; SUPER WASH; SUPER PERMANENT PRESS. Each of the SUPER WASH cycles provides six minutes of extra scrubbing automatically . . . ideal for heavily soiled things.

3 agitation and 2 spin speed selections let you choose any of six agitation and spin speed combinations to give each load custom washing care. LOW speed gives washable woolens, lingerie and sheer curtains the extra-careful washing they need.

Completely flexible . . . you choose the agitation and spin speeds, the cycle and washing time, the wash and rinse water temperatures and the water level to give each load the care it needs.

Improved care for Permanent Press fabrics: As soon as agitation is completed, the tub drains partially, then refills with cold rinse water *before* spinning. Clothes are cooled gradually, floating free, and return to their original contours. When spinning starts, clothes are back in their original shape, with creases and pleats intact. And the spin itself has been shortened so it's just long enough to extract excess moisture and reduce the possibility of wrinkles.

Washer model LTA 9920 A
Dryer model LTE/I 9920 A-1A

Washer and matching 2-speed gas or electric dryer available in your choice of edged avocado or edged copper, all with simulated walnut wood grain front. (Model LTA 9920 and LTA 9925, white only with standard front finished in acrylic enamel.)

5 pushbutton water temperature selections: Choose HOT wash with WARM rinse; WARM wash with WARM rinse; COLD wash with COLD rinse; HOT wash with COLD rinse; WARM wash with COLD rinse.

Water level selector provides the right water level for any load from HI (17 gallons) to LOW (10½ gallons) or any level between. Save water . . . save detergent.

Hand Washable setting for washbasin-size loads. One setting gives correct water level (7 gallons) for both washing and rinsing, automatically provides LOW wash speed.

Automatic bleach dispenser.

Automatic fabric softener dispenser.

MAGIC CLEAN self-cleaning filter traps lint continuously during washing and rinsing. You never touch filter or lint.

New Super SURGILATOR agitator creates "million"-current water action to wash clothes clean gently, yet thoroughly. Smooth polypropylene agitator is virtually unbreakable; won't rust or peel.

Thorough rinsing: 4 power-spray rinses, followed by an agitated deep rinse, then 4 more power-spray rinses flush dirt and scum away from clothes.

Free-Flow* draining carries soil and scum away from, not through, clothes.

Washer fills to correct level regardless of water pressure.

Backed by a 2-year parts warranty (with a 5-year warranty on the sealed gear case!)

During your first year of ownership, all parts of the appliance (except light bulbs) which we find are defective in materials or workmanship will be repaired or replaced by Whirlpool free of charge, and we will pay any labor charges.
During the second year, we will continue to assume the same responsibility as stated above, except you pay any labor charges.
During the third, fourth and fifth year of ownership, any parts in the gear case assembly will be repaired or replaced if found defective by us. We'll assume responsibility for parts. You pay for the labor.
This protection is yours as the original purchaser for your home use, and requires that all service be performed by a service organization authorized to service Whirlpool products. Naturally, it doesn't cover damage by accident, misuse, fire, flood or acts of God. But it does cover you wherever you live in the United States . . . even if you move.

3-point suspension helps prevent annoying creep.

Self-leveling rear legs.

Spinning action slows to a stop when lid is opened.

Tub is lighted automatically.

Fluorescent lamp illuminates complete work surface, timer dial and water level control.

Cabinet is Flo-Coated and then finished with Lifecoat acrylic enamel on chemically treated 18-gauge steel. Top and lid are finished in porcelain enamel. Perforated tub has sparkling white porcelain-enamel finish.

Pump Guard collects pins, buttons and other small items that could clog pump.

Thrifty SUDS-MISER system (model LTA 9925) helps save water and detergent.

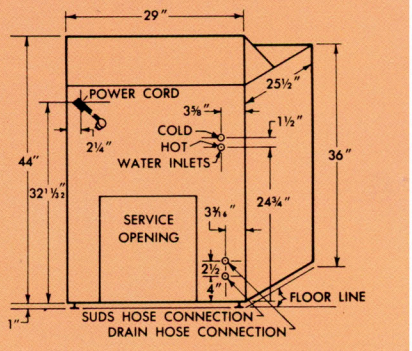

Caster kit available for non-permanent installations.

Specifications for automatic washer model LTA 9920 A-E; LTA 9920

Motor – 3-speed, ½ hp., 120-volt, 60-cycle, A.C., 1725 r.p.m., 1140 r.p.m. and 850 r.p.m. Mounted in rubber.
Commercial-type transmission and heavy-duty sealed gear case.
Shipping weight – Approx. 253 lbs. crated.
Approval – Listed under Reexamination Service of Underwriters' Laboratories, Inc.

Specifications subject to change without notice.

And the spin has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

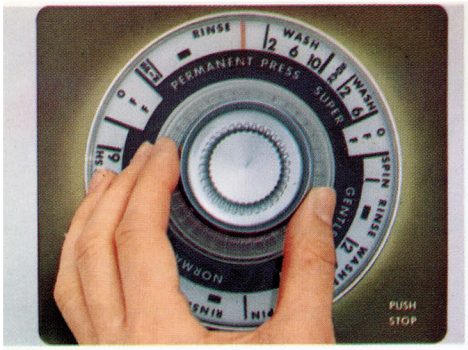

---

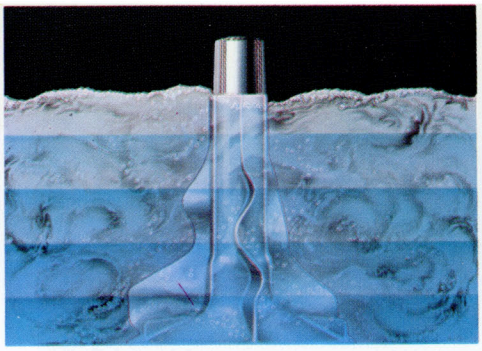

3 agitation speeds and 2 spin speeds

You're the boss with a Whirlpool washer. You determine the right combination of agitation and spin speeds to give each load custom washing care. Complete flexibility lets you dial any of six agitation and spin speed combinations. HI wash speed is best for sturdy, regular fabrics; MED for delicate fabrics; and LO for fragile and shrinkable items such as washable woolens, lingerie, sheer curtains. Agitating at only 34 strokes per minute, LO speed takes extra-gentle care of most all fabrics you used to do by hand.

5 cycle selections for complete washing versatility

Choice of many water levels for both washing and rinsing

Automatic dispensers add bleach and fabric softener to wash at just the right time

The modern washer that even gives Permanent Press fabrics better-than-ever care

washes clean... and how

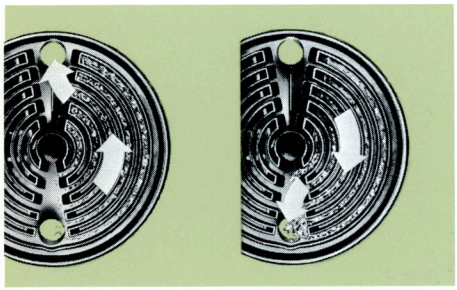

Super SURGILATOR agitator

More "scrubbing" currents, more "scrubbing" efficiency

Our new Super SURGILATOR agitator has an improved design to get clothes cleaner than ever before. We've extended the undulated vanes, so every movement of the agitator creates "millions" of the water currents that scrub clothes clean. And we've heightened the small vanes to increase scrubbing surfaces, make it possible to wash large loads really clean. Its bright, new finish makes the new Super SURGILATOR agitator even look clean!

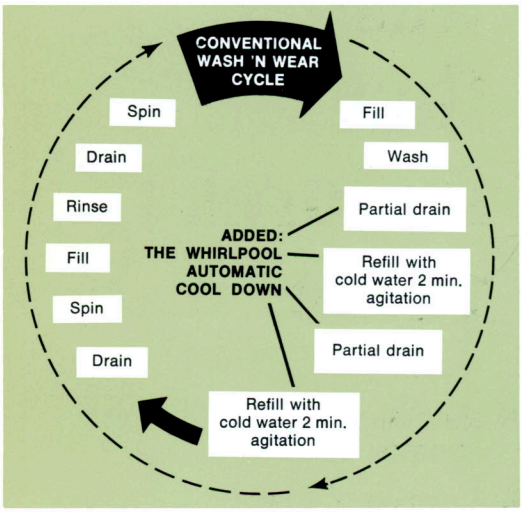

MAGIC CLEAN self-cleaning lint filter

If anything about an automatic ought to be automatic, it's the lint filter. As our MAGIC CLEAN filter recognizes. Not only does it do a thorough job of trapping lint automatically, it also cleans itself automatically. So you're never trapped by the messy job of cleaning the lint filter.

Improved Permanent Press care

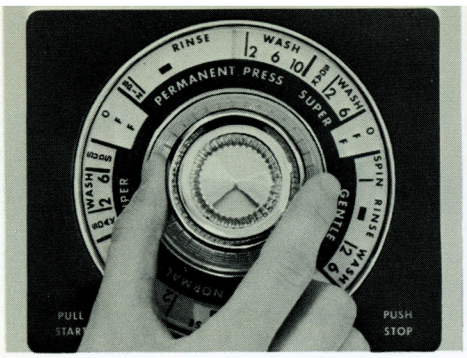

The way you wash Permanent Press fabrics is every bit as important as the way you dry them. When clothes are spun while still warm and pliable from being washed in hot water, they can come up with wrinkles. That can't happen in a Whirlpool washer. As soon as washing is completed, the tub drains partially, then refills with cold rinse water before any spinning takes place (see cool-down diagram at right). Garments are cooled gradually, floating free, so they return to their original contours. Then they spin. And the spin has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

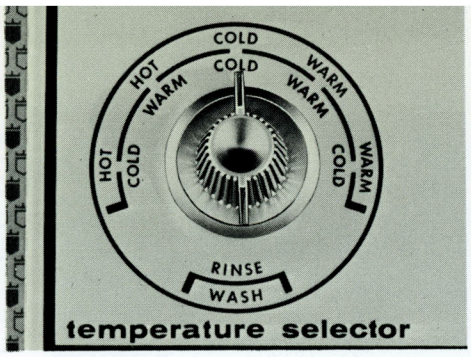

2 agitation speeds and 2 spin speeds

Whether you're washing a load of sturdy, regular fabrics that are really dirty or delicate things that just need freshening up, two agitation speeds provide proper washing care. Normal speed uses a brisk agitation to "scrub" away stubborn soil while the slower agitation action of the gentle speed is made-to-order for filmy fabrics and fragile garments. And it's automatic in a Whirlpool washer . . . just set the cycle, you get the proper speed.

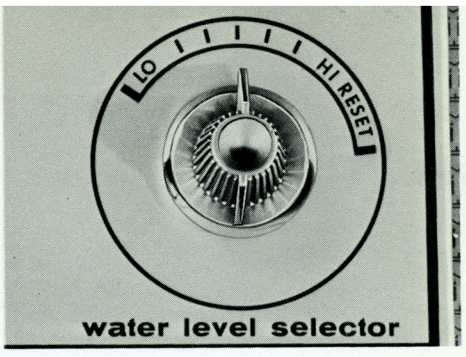

5 cycle selections for complete washing versatility

5 wash-rinse water temperature selections

Choice of many water level selections to match amount of water to size of load

The modern washer that even gives Permanent Press fabrics better-than-ever care

5 cycle selections: NORMAL; GENTLE; PERMANENT PRESS; SUPER WASH; SUPER PERMANENT PRESS. Each of the SUPER WASH cycles provides six minutes of extra scrubbing automatically . . . ideal for heavily soiled things.

2 agitation-spin speeds provide the correct combination of agitation and spin speeds automatically when cycle is selected.

Improved care for Permanent Press fabrics: As soon as washing is completed, the tub drains partially, then refills with cold rinse water *before* spinning. Clothes are cooled gradually, floating free, and return to their original contours. When spinning starts, clothes are back in their original shape, with creases and pleats intact. And the spin itself has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

5 water temperature selections: Choose HOT wash with WARM rinse; WARM wash with WARM rinse; COLD wash with COLD rinse; HOT wash with COLD rinse; WARM wash with COLD rinse.

Washer model LTA 8800
Dryer model LTE/I 8800-1

Washer and matching gas or electric dryer come in your choice of edged avocado, edged copper or white (model LTA 8805, white only).

Water level selector provides the right water level for any load from HI (17 gallons) to LO (9½ gallons) or any level between. Save water . . . save detergent.

Bleach dispenser properly dilutes liquid bleach automatically, before it enters wash water, so "raw" bleach never touches your fabrics. Easy to fill.

Automatic fabric softener dispenser.

MAGIC CLEAN self-cleaning filter traps lint continuously during washing and rinsing. You never touch filter or lint.

New Super SURGILATOR agitator creates "million"-current water action to wash clothes clean gently, yet thoroughly. Smooth polypropylene agitator is virtually unbreakable; won't rust or peel.

Whirlpool CORPORATION

Benton Harbor, Michigan. Manufacturer of Automatic Washers, Wringer Washers, Clothes Dryers, Freezers, Refrigerators, Refrigerator-Freezers, Ice Makers, Dishwashers, Built-In Ovens and Surface Units, Ranges, Food Waste Disposers, Central Vacuum Systems, Dehumidifiers, Air Conditioners.

Washes the big loads...small loads ...and in-between loads

Giant-size SURGILATOR® agitator and super-capacity tub

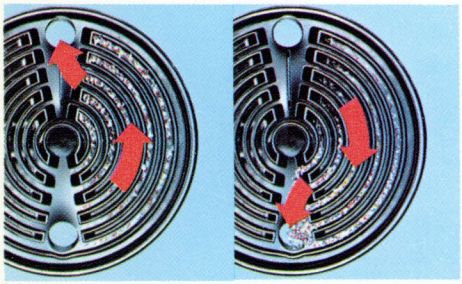

Now you can wash those extra-big loads as easily as you wash small or regular-size loads. And by "extra-big" we mean loads all the way up to 18 lbs.! That's a lot of washing in one load, especially when clothes come sparkling clean in the same amount of time it takes a regular washer to wash a normal-size load. There are no gadgets, gimmicks, or special attachments. Just the giant-size SURGILATOR agitator to create the kind of water action it takes to get clothes exceptionally clean. And this Whopper has the heavy-duty strength and performance to handle the job . . . time after time, year after year.

Check and compare the sizeable difference.

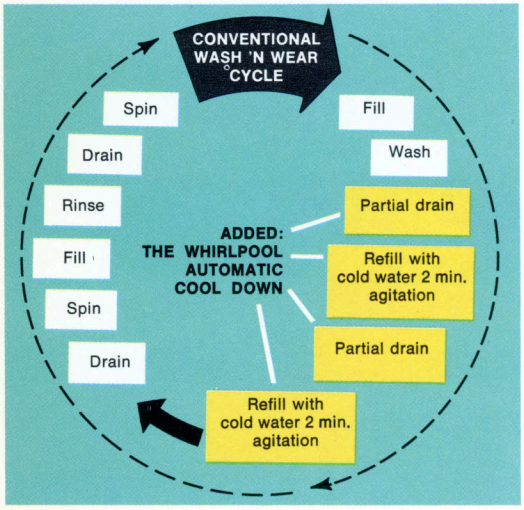

MAGIC CLEAN self-cleaning lint filter

If anything about an automatic ought to be automatic, it's the lint filter. As our MAGIC CLEAN filter recognizes. Not only does it do a thorough job of trapping lint automatically, it also cleans itself automatically. So you're never trapped by the messy job of cleaning the lint filter.

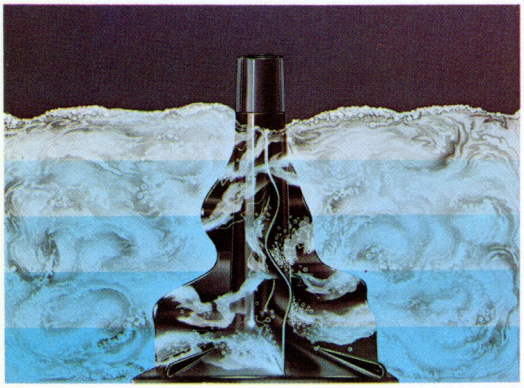

Improved Permanent Press care

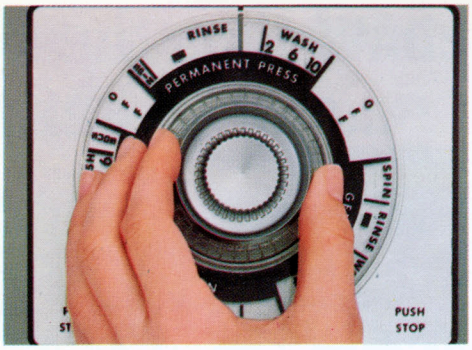

The way you wash Permanent Press fabrics is every bit as important as the way you dry them. When clothes are spun while still warm and pliable from being washed in hot water, they can come up with wrinkles. That can't happen in a Whirlpool. As soon as washing is completed, the tub drains partially, then refills with cold rinse water before any spinning takes place (see cool-down diagram at right). Garments are cooled gradually, floating free, so they return to their original contours. Then they spin. And the spin has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

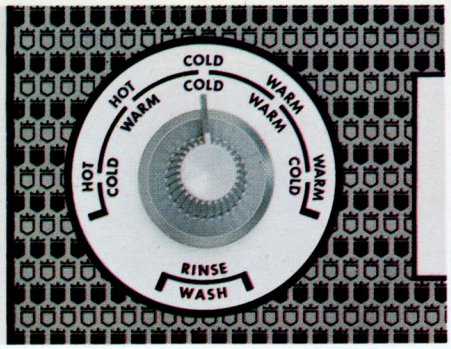

Choice of many water level selections for both washing and rinsing

No need to worry about wasting water on a less-than-18-lb. load! Just choose the level of water you need for the size load you're washing. You can select any amount desired from the low level of 15 gals. for small, lightweight loads up to a full 25 gals. When you choose the wash water level . . . the rinse fill is also automatically pre-set. And you can vary the water level any time by simply turning the selector to RESET and then back to the new level desired.

4 cycles, 2 agitation-spin speed combinations for automatic fabric care

5 wash-rinse water temperature selections

SUPER WASH gives extra-dirty things an extra scrubbing automatically

The modern washer that even gives Permanent Press fabrics better-than-ever care

4 cycle selections: NORMAL; GENTLE; PERMANENT PRESS; SUPER WASH which gives heavily soiled items six minutes of extra scrubbing automatically.

2 agitation-spin speeds provide the correct combination of agitation and spin speeds automatically when cycle is selected.

Improved care for Permanent Press fabrics: As soon as washing is completed, the tub drains partially, then refills with cold rinse water *before* spinning. Clothes are cooled gradually, floating free, and return to their original contours. When spinning starts, clothes are back in their original shape, with creases and pleats intact. And the spin itself has been shortened so it's just long enough to extract excess moisture and reduce the possibility of wrinkles.

Super SURGILATOR agitator

More "scrubbing" currents, more "scrubbing" efficiency

Our new Super SURGILATOR agitator has an improved design to get clothes cleaner than ever before. We've extended the undulated vanes, so every movement of the agitator creates "millions" of the water currents that scrub clothes clean. And we've heightened the small vanes to increase scrubbing surfaces, make it possible to wash large loads really clean. Its bright, new finish makes the new Super SURGILATOR agitator even look clean!

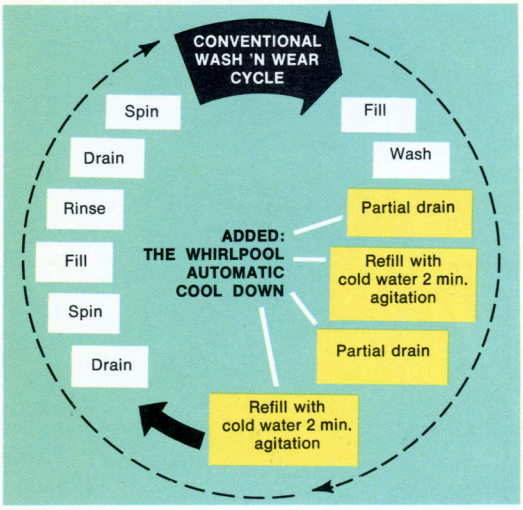

MAGIC CLEAN self-cleaning lint filter

If anything about an automatic ought to be automatic, it's the lint filter. As our MAGIC CLEAN filter recognizes. Not only does it do a thorough job of trapping lint automatically, it also cleans itself automatically. So you're never trapped by the messy job of cleaning the lint filter.

Improved Permanent Press care

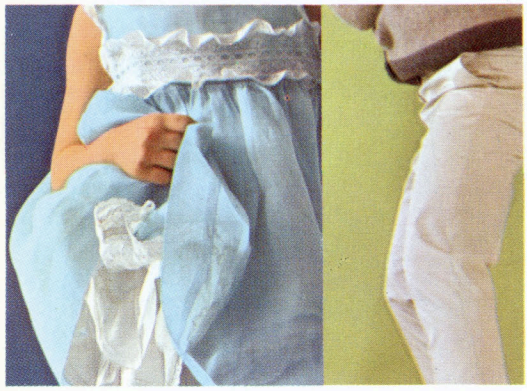

The way you wash Permanent Press fabrics is every bit as important as the way you dry them. When clothes are spun while still warm and pliable from being washed in hot water, they can come up with wrinkles. That can't happen in a Whirlpool. As soon as washing is completed, the tub drains partially, then refills with cold rinse water before any spinning takes place (see cool-down diagram at right). Garments are cooled gradually, floating free, so they return to their original contours. Then they spin. And the spin has been shortened so it's just long enough to extract moisture and reduce the possibility of wrinkles.

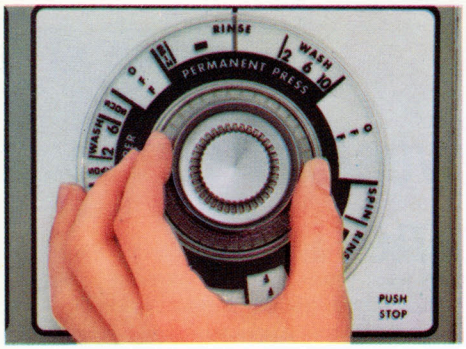

---

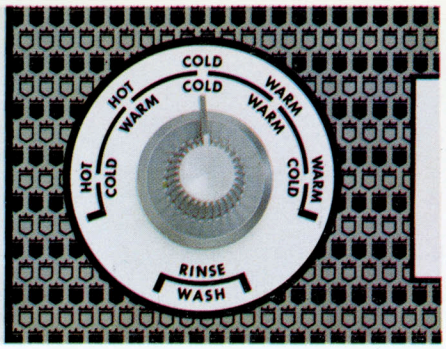

2 agitation speeds and 2 spin speeds

Whether you're washing a load of sturdy, regular fabrics that are really dirty or delicate things that just need freshening up, two agitation speeds provide proper washing care. Normal speed uses a brisk agitation to "scrub" away stubborn soil while the slower agitation action of the gentle speed is made-to-order for filmy fabrics and fragile garments. And it's automatic in a Whirlpool washer . . . just set the cycle, you get the proper speed.

4 cycle selections for complete washing versatility

5 wash-rinse water temperature selections

SUPER WASH gives extra-dirty things an extra scrubbing automatically

The modern washer that even gives Permanent Press fabrics better-than-ever care

4 cycle selections: NORMAL; GENTLE; PERMANENT PRESS; SUPER WASH which gives heavily soiled items six minutes of extra scrubbing automatically.

2 agitation-spin speeds provide the correct combination of agitation and spin speeds automatically when cycle is selected.

Improved care for Permanent Press fabrics: As soon as washing is completed, the tub drains partially, then refills with cold rinse water *before* spinning. Clothes are cooled gradually, floating free, and return to their original contours. When spinning starts, clothes are back in their original shape, with creases and pleats intact. And the spin itself has been shortened so it's just long enough to extract excess moisture and reduce the possibility of wrinkles.

5 water temperature selections: Choose HOT wash with WARM rinse; WARM wash with WARM rinse; COLD wash with COLD rinse; HOT wash with COLD rinse; WARM wash with COLD rinse.

Washer model LTA 6700
Dryer model LTE/I 6700-1

Washer and matching gas or electric dryer come in your choice of edged avocado, edged copper or white.

3-level water selector automatically provides HI, MED or LO water level. You can match amount of water to size of load.

Bleach dispenser properly dilutes liquid bleach automatically, before it enters wash water, so "raw" bleach never touches your fabrics. Easy to fill.

MAGIC CLEAN self-cleaning filter traps lint continuously during washing and rinsing. You never touch filter or lint.

New Super SURGILATOR agitator creates "million"-current water action to wash clothes clean gently, yet thoroughly. Smooth polypropylene agitator is virtually unbreakable; won't rust or peel.

Thorough rinsing: 4 power-spray rinses, followed by an agitated deep rinse, then 4 more power-spray rinses flush dirt and scum away from clothes.

Free-Flow* draining carries soil and scum away from, not through, clothes.

Washer fills to correct level regardless of water pressure.

Spinning action slows to a stop when lid is opened.

Backed by a 2-year parts warranty (with a 5-year warranty on the sealed gear case!)

During your first year of ownership, all parts of the appliance (except light bulbs) which we find are defective in materials or workmanship will be repaired or replaced by Whirlpool free of charge, and we will pay any labor charges.

During the second year, we will continue to assume the same responsibility as stated above, except you pay any labor charges.

During the third, fourth and fifth year of ownership, any parts in the gear case assembly will be repaired or replaced if found defective by us. We'll assume responsibility for parts. You pay for the labor.

This protection is yours as the original purchaser for your home use, and requires that all service be performed by a service organization authorized to service Whirlpool products. Naturally, it doesn't cover damage by accident, misuse, fire, flood or acts of God. But it does cover you wherever you live in the United States . . . even if you move.

Cabinet is Flo-Coated and then finished with Lifecoat acrylic enamel on chemically treated 18-gauge steel. Top and lid are finished in porcelain enamel. Perforated tub has misty white porcelain-enameled finish.

Pump Guard collects pins, buttons and other small items that could clog pump.

3-point suspension helps prevent annoying creep.

Self-leveling rear legs.

Thrifty SUDS-MISER system (model LTA 6705) helps save water and detergent.

Caster kit available for non-permanent installations.

Specifications for automatic washer model LTA 6700

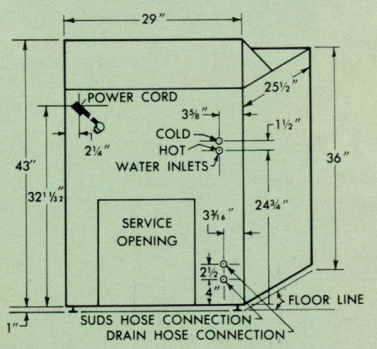

Motor – 2-speed, ½ hp., 120-volt, 60-cycle, A.C., 1725 r.p.m. and 1140 r.p.m. Mounted in rubber.

Commercial-type transmission and sealed gear case.

Shipping weight – Approx. 243 lbs. crated.

Approval – Listed under Reexamination Service of Underwriters' Laboratories, Inc. *Tmk.

Specifications subject to change without notice.

Super SURGILATOR agitator

More "scrubbing" currents more "scrubbing" efficiency

Our new Super SURGILATOR agitator has an improved design to get clothes cleaner than ever before. We've extended the undulated vanes, so every movement of the agitator creates "millions" of the water currents that scrub clothes clean. And we've heightened the small vanes to increase scrubbing surfaces, make it possible to wash large loads really clean. Its bright, new finish makes the new Super SURGILATOR agitator even look clean!

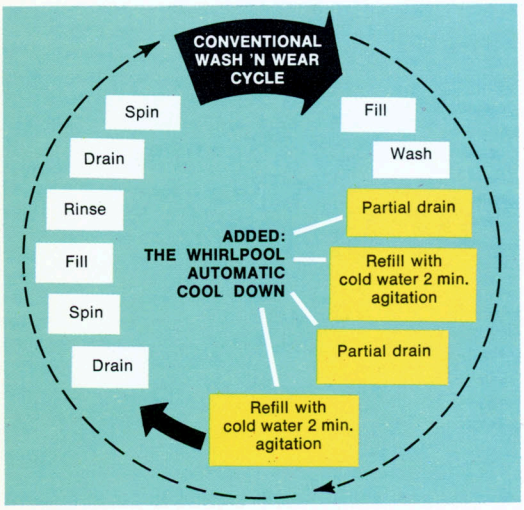

Exclusive Magic-Mix filter traps and holds lint

There's probably nothing worse than lint on just-washed clothes! It can be a real stickler. But that's where the Magic-Mix filter comes in. Its hundreds of nylon "fingers" capture and hold objectionable lint. And, the Magic-Mix filter works in every cycle, on full or partial loads. Built in out of the way of loading and unloading, it's easy to remove, too.

Improved Permanent Press care

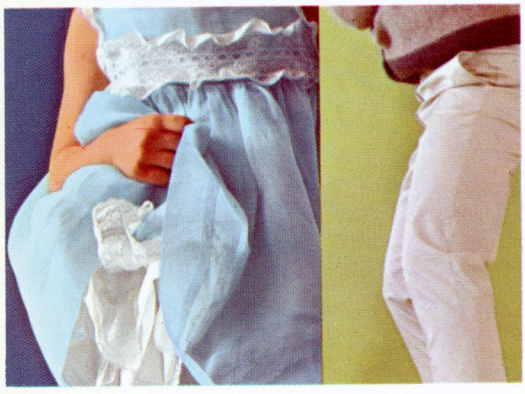

The way you wash Permanent Press fabrics is every bit as important as the way you dry them. When clothes are spun while still warm and pliable from being washed in hot water, they can come up with wrinkles. That can't happen in a Whirlpool washer. As soon as washing is completed, the tub drains partially, then refills with cold rinse water before any spinning takes place (see cool-down diagram at right). Garments are cooled gradually, floating free, so they return to their original contours. Then they spin. And the spin has been shortened so its just long enough to extract moisture and reduce the possibility of wrinkles.
