

DISK ONLY DIGITAL CONTENT ARCHIVE SOLUTION

SOLUTION BRIEF

Key benefits

Increase productivity

Streamline workflow processes with a common, scalable disk archive platform that allows you to share assets efficiently.

Enhance the protection of your archived video assets

Replicate content partially or entirely in another location to provide backup, disaster recovery or sharing across business units.

Expand revenue opportunities

Create faster, easier access to content, which permits greater re-use and re-licensing.

Lower costs

Reduce expenses associated with storage, maintenance, floor space, shelf space and operational overhead.

If fast access to your content is a top priority along with objectives such as streamlining workflow, protecting video assets, and containing costs, choose a common, scalable digital content archive platform. Regardless of the size of your broadcast or media company, you can implement a proven, integrated solution that simplifies content capture, production, to-air and archive.

Industry leaders StorageTek® and Front Porch Digital (FPD), an Incentra Solutions company, have teamed to offer jointly-tested and certified digital content archive solutions. At more than 40 installations worldwide, StorageTek and FPD have combined their expertise in storage and digital archive management software to deliver solutions that improve productivity, enhance asset protection and expand revenue opportunities.

Improve workflow across your organization

Front Porch's best-of-breed DIVArchive software platform enables interoperability between digital media workflow and StorageTek's disk storage solutions, video servers, and editing systems. As a result, you can lower costs while you simplify the process of preserving, managing and accessing content in these key operational areas:

- Managed nearline storage for broadcast playout
- Expansion of centralized post-production storage connected to leading non-linear editing platforms
- Interconnection among post-production, news and broadcast playout
- Disaster recovery
- Digital workflow management
- Digital asset management

Choose the integrated, industry-leading solution

A disk-only digital content archive leverages DIVArchive as well as StorageTek's FlexLine™ 200, 300 and 600 series online storage systems. You gain a reliable, high-performance infrastructure that can be optimized for fast access to archived content and/or high-capacity applications. With a broad selection of compatible FlexLine controllers, arrays and software, a FlexLine system can be customized to meet your specific business needs.

Maximize the speed, efficiency, volume and capacity of your digital media processing, management and distribution services. And operate with confidence, knowing your solution is backed by first-class support.
