

SOLUTIONS

SECURITY SURVEILLANCE

Key benefits

Lower costs

Reduce the costs of recording, managing and storing video compared to conventional digital recording solutions.

Increase efficiency

Eliminate manual intervention and access stored data more easily, regardless of age or file size.

Reduce complexity

StorageTek® works with leading application providers and systems integrators to give you a turnkey security data management system that integrates seamlessly into your existing network environment.

Enhance security

Capture, manage and store larger amounts of security surveillance data to support expanded security capabilities.

Extend your reach

Add storage, cameras and other security devices easily as you need them, without downtime or major additional expense.

As security threats increase, businesses need to improve the way they provide the safety and protection of people and property. An important element in any security plan is the use of digital video for identification and transaction monitoring. But even advanced surveillance systems are of limited use unless the data they collect can be stored securely and accessed immediately when needed. That's why there is a growing demand for sophisticated information storage and management capabilities for security and surveillance data. StorageTek® understands this need. We've partnered with leading software vendors and system integrators to provide a cost-effective digital video archive that can support your complex security applications today and in the future.

You're secure with StorageTek®

StorageTek's highly advanced digital video archive solution can help you solve your security-related data storage and storage management problems while supporting a number of critical business requirements, including:

- .. Asset protection — personnel and business
- .. Mandated security — banking, finance, corporate, gaming
- .. Property damage assessment — vandalism, collision
- .. Liability protection — "slips and falls"
- .. Real time monitoring — manufacturing facilities, child care
- .. Transactional documentation — ATM, point of sale, ERP
- .. Visual verification of events — security breach, SCADA, biometrics
- .. Business operations — training, effective marketing promotions, customer buying behaviors, counting and traffic patterns

Calm the chaos in security data management

Does your security system include a process for storing and managing data that matches the sophistication of your surveillance equipment? Some surveillance systems use management-intensive video cassette recorders. With these systems you need to store and retrieve tapes manually. And to make sure you can retrieve the right information from the right tape, you must follow a painstaking process of reviewing and cataloging hour upon hour of video footage.

With digital video recorders storage is often not shareable, limited in capacity and lacks enterprise reliability and protection. This leads to unnecessary and costly purchases in additional DVR equipment to support storage requirements as well as unplanned downtime.

StorageTek's total storage solution virtually eliminates manual intervention and provides sophisticated hierarchical storage management so that digital information is stored on the right storage device — disk or tape — and is always available, regardless of age of the data or file size. And StorageTek's digital video archive solution can be configured to support varied archive periods to match the security profiles of different locations within your business.

An 'open' approach to digital information management

StorageTek's digital video archive solution integrates disk and tape hardware with advanced storage management software for a complete turnkey storage solution. This open solution provides a seamless connection within your network infrastructure while protecting your investments in current equipment. It delivers unprecedented levels of storage capacity, performance, reliability, availability and security. And it offers the flexibility and true data sharing that can maximize the value of disparate security systems, even among devices or systems from different manufacturers.

How much storage do you need?

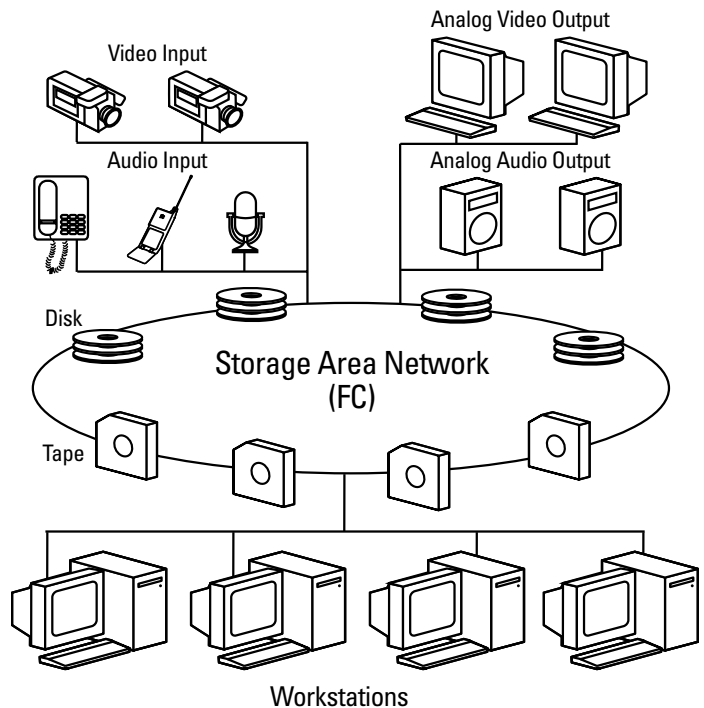

With StorageTek's digital video archive solution, you don't need to worry. Our storage solutions are completely scalable — from gigabytes to multiple petabytes — to help you quickly and cost-effectively increase capacity as your storage needs change over time.

Trust your digital video storage to the storage experts

StorageTek has provided ultra-reliable storage solutions to its worldwide customers for more than 30 years. That's why you can trust us to help you implement the right security surveillance solution. With a broad range of high performance, scalable tape libraries, disk, networking and storage management software solutions, we are the safe choice to meet your security needs. StorageTek's comprehensive digital video archive solution for security surveillance can help keep your eyes open, all the time.

To learn more

To find out more about digital video archives for security and surveillance applications, contact your StorageTek representative or visit www.storagetek.com.

StorageTek's digital video archive solution for security surveillance connects to your existing network infrastructure, enhancing your storage management, archive, and retrieval capabilities. You can easily add storage capacity or security equipment as your needs change.

ABOUT STORAGETEK®

Storage Technology Corporation (NYSE: STK), a \$2 billion worldwide company with headquarters in Louisville, CO, has been delivering a broad range of storage management solutions designed for IT professionals for over 30 years. StorageTek offers solutions that are easy to manage, integrate well with existing infrastructures and allow universal access to data across servers, media types and storage networks. StorageTek's practical and safe storage solutions for tape automation, disk storage systems and storage integration, coupled with a global services network, provide IT professionals with confidence and know-how to manage their entire storage management ecosystem today and in the future.

StorageTek products are available through a worldwide network. For more information, visit www.storagetek.com, or call 1.800.275.4785 or 01.303.673.2800.
